

DICK'S LUMBER & BUILDING SUPPLIES

BE IT NOISY NEIGHBORS OR A STORM WE'LL PROTECT YOU!

ROCKWOOL® Stone Wool Insulation

Save on energy by insulating your home with ROCKWOOL Insulation.

ROCKWOOL is made from non-combustible natural stone and recycled material. Its unique non-directional Canadian Fibre structure and higher density give it better dimensional stability and make it an effective barrier against noise.

ROCKWOOL COMFORTBATT®, SAFE'n'SOUND® and COMFORT BOARD 80 & 110 offer far more than conventional insulations. Don't settle for anything less when you build or renovate.

ROCKWOOL delivers exceptional home improvement and energy conservation value.

- Easily cut
- Non-combustible
- Excellent sound absorbency
- Does not rot or promote growth of fungi or mildew
- Low moisture sorption
- Water and moisture resistant

Fiberglass Insulation

Johns Manville Formaldehyde-free™ fiberglass insulation provides thermal and acoustical control for both vertical and horizontal applications. Fiberglass insulation is available in a wide range of thermal resistance R-values. Explore your fiberglass insulation options at a Dick's Lumber location near you.

FOAMULAR (XPS) Extruded Polystyrene Rigid Insulation

FOAMULAR (XPS) Rigid Insulation is made in Canada and offers a combination of characteristics that has result exceptional moisture resistance.

Using FOAMULAR insulation can create comfortable living spaces in basements, as well as minimizing heat loss or gain when using it on above-grade exterior walls and the interior of foundation walls.

- Used under residential garage slab (30psi)
- Moisture-resistant
- R-5 per inch of thickness

PlastiSpan HD Insulation

The Most Cost-effective Rigid Insulation Expanded Polystyrene

is a closed cell, rigid foam plastic insulation that maintains its R-value for the life of the product. When applied as continuous insulation over foundations, walls and roofs. PlastiSpan HD insulation is a cost-effective solution that eliminates thermal bridging, increasing your total R-value. By increasing your energy efficiency with PlastiSpan HD insulation, you will effectively reduce your heating and cooling costs.

DuroFoam Insulation

Durable, Rigid Film-Faced Insulation

is a closed cell and moisture resistant insulation with a thin film laminated to both sides of the product. Durofoam is easy to install and can be used in many applications; exterior sheathing, continuous insulation, basement floors, under slab insulation and cathedral ceilings.

DuroSpan GPS Insulation

High R-Value, Film-Faced Graphite-Enhanced Polystyrene

is a higher R-value product manufactured with NEOPOR – a graphite enhanced polystyrene. DuroSpan GPS is manufactured to meet code requirements, with a thin film laminated to both sides for a more durable, flexible product. This easy to cut and install insulation has Low GWP, maintain a permanent R-value for the life of the product, and is part of an air barrier system.

Available in different R-values and thicknesses to meet the needs of your project.
